

Atul Jain

AI Product Manager

Profile

Atul Jain is an AI Product Manager and CSPO-certified professional with 9 years of experience building and scaling digital products across Fintech, Adtech, and Supply Chain domains. He specializes in AI-powered product development, including Generative AI, AI agents, RAG (Retrieval-Augmented Generation), LLM applications, workflow automation, and vibe coding.

Personal Projects

- € **AI Product Prioritization Platform** - Built and launched an AI-first product prioritization platform using vibe coding, prompt engineering, and AI-assisted development workflows. Managed end-to-end product lifecycle including design, deployment, analytics, and rapid feature iteration using Windsurf, Supabase, and Vercel. - <https://www.prioritizeai.co.in/>
- € **Habit Tracking Mobile Application** - Developed a React Native-based habit tracking application using Claude Code, Expo Go, and AI-assisted workflows, featuring weekly habit tracking and monthly analytics dashboards for wellness-focused activities - [App Link](#)
- € **Real-Time Options Trading Bot** - Engineered a real-time options trading bot integrated with the Fyers API, executing automated trades based on 5-minute trigger strategies with live dashboards for trade monitoring, signals, and performance analytics.
- € **Multi-Agent AI CRM Workflow** - Designed a multi-agent AI workflow in Claude Code with specialized agents for Product Management, Architecture, Frontend, Backend, QA, and Design. Built a CRM platform with onboarding, Twilio-based mobile verification, admin approvals, lead management, and PostgreSQL-backed operations.
- € **Local LLM Experimentation** - Experimented with local LLMs including Gemma and Qwen via Ollama to explore self-hosted AI workflows, local inference, prompt engineering, and offline Generative AI applications.

Employment History

Data/AI Product Manager at Yum Brands, Gurugram

January 2025

- Spearheaded product management for an AI-driven QSR **SAAS** pricing optimization platform processing global restaurant transaction data from Snowflake. Delivered ML-powered capabilities including store clustering, market basket analysis, price elasticity modelling, sales/profit optimization, and pre/post impact analysis, enabling franchise owners to simulate pricing changes and increasing revenue by 2–3%.

Languages

English
French

- Designed an LLM-powered conversational analytics assistant using RAG architecture to enable franchise users to query pricing recommendations, sales forecasts, and operational insights through natural language interactions.
- Implemented product management for a SaaS-based Marketing Mix Modelling (MMM) platform used by marketing scientists to analyse and optimize media spend for global QSR brands including KFC Singapore. Managed end-to-end workflows for marketing data ingestion, validation, attribution modelling, and AI-driven media optimization across TV, digital, and social campaigns.
- Collaborated on machine learning and Generative AI-enabled analytics initiatives to attribute sales impact across media channels and recommend optimal budget allocation strategies, improving marketing efficiency and campaign ROI by an estimated 5–10% while enabling more data-driven decision-making.
- Collaborated with data science teams to integrate machine learning models for price elasticity, substitution, and complementary analysis, reducing manual analysis time
- Created PRD's, wireframes, managed stakeholders, prioritized features, managed sprints
- Managed quarterly product roadmap and backlog grooming based on stakeholder feedback
- Collaborated with engineering team to develop features, estimations and planning, testing and roll out

Senior Product Manager at Hindustan Times, Delhi

January 2022 – December 2024

- Managed end-to-end customer payments and collections platform integrated with [Razorpay](#), processing ₹60 Cr+ annual transactions. Delivered AI/ML-enabled payment optimization features including payment recommendations, customer segmentation, predictive failure detection, and smart retry workflows to improve collections efficiency, payment success rates, and user experience. Led cross-functional product execution, payment gateway integrations, analytics, and workflow automation
- Led a cross-functional team of 6 product managers and developers to drive end-to-end development and optimization of B2C ecommerce Hindustan Times advertisement booking platform, generating ₹24 Cr in annual revenue.
- Managed Salesforce CRM Sales Cloud development for web and mobile platforms, supporting 700 sales employees across diverse media verticals. Implemented key functionalities, including inventory planning, Einstein AI for predictive analytics, and a dynamic pricing engine. Optimized mobile app UX/UI, driving an 80% increase in user engagement.
- Spearheaded sprint planning, backlog grooming, and cross-functional collaboration to ensure seamless product delivery. Managed stakeholder alignment, developed comprehensive PRDs, and led wireframing sessions to define product features. Drove product roadmaps, ensuring strategic prioritization and timely execution of initiatives to meet business goals.

Product Manager at Ziploan, Delhi

December 2020 — January 2022

- Envisioned and designed the end-to-end customer journey across mobile and web applications, enhancing user engagement and optimizing conversion from lead generation to loan disbursement.
- Implemented machine learning-driven lead scoring, customer segmentation, and risk-based recommendation models to improve loan eligibility targeting, conversion rates, and collections efficiency.
- Leveraged predictive analytics and behavioural data modelling to identify high-intent borrowers, optimize underwriting decisions, and reduce default risk through data-driven credit assessment workflows.
- Integrated KYC, credit scoring CIBIL, API integration to deliver a seamless, secure, and efficient customer experience, reducing churn and increasing loan approval rates (TAT decreased by 30%)
- Implemented advanced call centre solutions, including autodialling and lead scoring optimization, to enhance operational efficiency and drive higher lead conversion rates

Product Manager at IIFL Home Loans, Gurgaon

June 2019 — December 2020

- Enhanced customer service and boosted NPS score by implementing AI-driven chatbots across App, Web, and WhatsApp platforms. Reduced TAT by 50% through the integration of automated IVR solutions, improving response time and customer satisfaction.
- Managed lead generation efforts, increasing website traffic by 50% through targeted strategies and SEO optimization. Expertly handled ZOHO CRM and ZOHO Desk for streamlined lead management, customer support, and process automation.

Product Manager at Capgemini, Bengaluru

June 2017 — June 2019

- Led the successful transition of financial processes from Unilever Poland to Capgemini, focusing on R2R (Record to Report) and P2P (Procure to Pay) processes.
- Conducted detailed process mapping, gap analysis, and drove process excellence initiatives. Utilized RPA (Robotic Process Automation) to streamline workflows and enhance operations
